OBJECTIVE

Full-Stack Developer with hands-on experience building production-ready applications using Laravel, PHP, JavaScript, WordPress, and modern frontend technologies. Skilled in backend architecture, API integrations, automation workflows, and scalable application development with a strong focus on clean, maintainable code. Experienced with AI-assisted development workflows using OpenAI, Claude, Cursor, and local AI agents to accelerate debugging, implementation, and engineering productivity.

EDUCATION

Bachelor of Computer Application , ISBM University	Apr 2022
Postgraduate Diploma in Computer Application , Makhanlal Chaturvedi National University	May 2021

SKILLS

Languages	JavaScript, PHP, HTML5, CSS3
Frontend	React.js, REST API Integration, Component-Based Architecture
Backend	Laravel, Node.js, Express.js, API Development, Webhooks
Databases	MySQL, PostgreSQL, SQLite, MongoDB
CMS	WordPress (Custom Themes, Plugins, Hooks, Filters, REST API)
E-Commerce	Shopify Theme 2.0, Liquid, JSON Templates, Shopify APIs
AI-Assisted Development	OpenAI APIs, Claude, Cursor, Qwen, Ollama, Local AI Agents
DevOps & Tools	Git, GitHub, GitLab CI/CD, Azure, Postman
Core Concepts	Async JavaScript, Authentication, API Design, Database Design
Soft Skills	Technical Communication, Problem Solving, Documentation, Team Collaboration

EXPERIENCE

Full-Stack Developer	Nov 2023 – Present
-----------------------------	--------------------

Digital Web Solutions Pvt. Ltd., Gurugram, Haryana

- Built custom WordPress themes and plugins from scratch using object-oriented PHP, reusable architecture patterns, hooks, filters, and PSR-4 autoloading.
- Developed scalable backend modules using Laravel, including service classes, repositories, routing, controllers, authentication flows, and database migrations.
- Integrated third-party APIs, payment workflows, analytics platforms, and webhook-based systems for real-time functionality and external service communication.
- Worked on headless and API-driven integrations using WordPress REST API and custom backend endpoints.
- Optimized application performance by improving database queries, reducing load times, and implementing maintainable backend structures.
- Built reusable frontend components and integrated APIs in React-based applications with focus on scalability and maintainability.
- Used AI-assisted development workflows with Cursor, OpenAI APIs, Claude, Qwen, and Ollama to accelerate debugging, code generation, refactoring, and repetitive engineering tasks.
- Collaborated with designers, project managers, and developers while clearly communicating technical decisions, implementation approaches, and delivery timelines.
- Proactively identified technical risks and dependencies, proposing mitigation strategies to ensure on-time and high-quality delivery.

Trainee Developer

Aug 2023 – Nov 2023

Digital Web Solutions Pvt. Ltd., Gurugram, Haryana

- Assisted in Laravel backend development including routing, controllers, migrations, database operations, and API integrations.
- Contributed to WordPress custom theme development and plugin customization under senior developer guidance.
- Worked with REST APIs, authentication flows, and third-party integrations across client projects.
- Supported debugging, implementation, and automation workflows using AI-assisted development tools and local agent setups.
